

# linuxAV.org: Activity

- Project aim:
  - Move the linuxaudio.org consotrium to the next level
  - Raise the profile of the Audio/Media community within GNU/
  - Web collaboration & communication platform
- Features:
  - Long living data-format, Content-sharing, PubSub.
  - linuxaudio.org - ~3000 subscribers, 50000 regular web vistors, 2-3 TByte/month uplink (mirror/downloads)
  - Libopenvideo: ~50 core-devs

# linuxAV.org: Challenges

- Too much to do, too little time
- Balance small private blogs vs. larger organizations (linuxfoundation, kernel.org)
- Diverse skills required (from coding, protocol development to interaction and web-design)
- 
- 

# linuxAV.org: Dependencies

- Projects/Protocols in use:
  - DokuWiki (PHP)
  - XMPP, Atom, oAuth, openID, wikiRPCInterface2, open-search.
- Projects that depend on us:
  - [apps.linuxaudio.org](http://apps.linuxaudio.org)

# linuxAV.org: Next Steps

- Rethink concept (eg. hooks for git-wiki)
- finish PubSub Plugin for DokuWiki (merge on conflict, media-file sync..)
- include XMPP<>HTTP gateway.
- Host a logo/design competition !?
- Choose a domain-name: libreAV, openvideo, openmedia,...
