

Mozilla: Activity

WebM standardisation & development

- Real time communications (IETF activity)
- Support for Accessibility efforts
- Continue building out HTML5 support

Mozilla: Challenges

- Still alone with Opera in terms of open media support
- Adoption continues to be a challenge
 - Ecosystem around WebM still coming together
- Need closure on standards for accessibility
- Competition: adaptive bandwidth, streaming and client-side stitching

Mozilla: Next Steps

- Shipping Firefox 4 (with WebM support)
- Scoping Real Time Communications
- Want help with a11y and adaptive bandwidth
