

That's Me

- Edward Hervey
- Founding partner of Collabora Multimedia
- GStreamer and PiTiVi
- FOSS user since 1995, active hacker since 2003

GStreamer : Activity

- Project aim:
 - Open-source 'standard' multimedia framework
 - Removing hard dependencies for applications
 - Help resolve the multimedia legal mess
- Features:
 - Supports almost all formats
 - Allow FOSS and proprietary to co-exist
 - Not just playback...

GStreamer: Challenges

- Still lots of duplicated code in plugins
- Hidden required behaviour for plugins
- Not enough libraries/systems wrapped
- We need more multimedia use-cases
- Regression & QA testing

GStreamer: Next Steps

- Wrap more multimedia libraries/systems
- More helper libraries
- More base classes
- More applications and use case
- GStreamer 1.0
