

That's Me

- Timothy B. Terriberry
- Theora, VP8, CELT, Vorbis/Tremor, etc.
- To get stuff done

Activity

- Project aim:
 - Royalty-Free Codecs
 - Focus: Low-level codec development
- Features:
 - Improved encoding quality
 - Low-latency, full-band audio

Challenges

- Problems:
 - Too much to do (a good problem to have)
 - Getting active developers
- Technology gap:
 - Need a royalty-free answer to H.265

Next Steps

- Get Tremor & ARM optimizations for Theora and VP8 into Fennec
- Finalize the CELT bitstream
- Improve VP8 encoder
- Prove out ideas for next-generation video codec
